Description

Module: Java Designer I think this bug is strongly linked the defect **Java Designer – Item duplication in contextual menu.**

1. Opening contextual menu and choose: **Java Designer by Modeliosoft** (like the screenshot named modelio-NullPointerException.png)
2. Click on **Reverse** item menu (like the screenshot named modelio-NullPointerException.png): **Nothing happen.**
3. Click next to the menu, to close it. The message with NullPointerException appears. (see the screenshot named modelio-NullPointerException 2.png)
