<b>Description</b>	
<p>Hi,</p> <p>If I add a combined fragment to the diagram which is places over a lifeline and them I will add a note to this lifeline, I'm not able to connect the note to the lifeline. Instead modelio will add the note to the combined fragment.</p> <p>Steps to reproduce:– Create a sequence diagram– add a class to the diagram– add a lifeline to the class– add a combined fragment over the lifeline to the diagram– try to add a node to the life line within the combined fragment</p> <p>Effect:– The combined fragment will be selected instead of the lifeline</p> <p>Last checked with:– Version 3.7.01– Build: 201803142330– System: linux (4.4.0-93-generic)– Architecture: x86_64</p>
