

Modelio 3 - Issue #363

Installation on Debian Buster (10) / upgrade of webkitgtk

21 April 2019 14:00 - Remy LABENE

Status:	Assigned	Start date:	08 March 2019
Priority:	Medium	Due date:	
Assignee:	Remy LABENE	% Done:	0%
Category:		Estimated time:	0.00 hour
Target version:	Modelio 3.8.1		
Description			
Same problem CentOS and Debian buster 10. The package modelio-open-source3.8-3.8.0.x86_64.deb fails to install due to a dependency on webkitgtk. It is unclear where webkitgtk-1.0 libraries could be found. Debian buster does distribute webkitgtk3 and webkitgtk4.

Please note that Modelio 3.8.1 has been released. Modelio 3.8.1 is compatible with Debian 7/8/9. We are aware about this dependency restriction and it will be taken into account in future versions of Modelio. Concerning CentOS, please note that a specific packaging for CentOS 7 is now available on the download page.
