Target version:	
Description	
I've just installed on my win10 x64 laptop and it is unusable out of the box.	
2560x1440 on a 13" screen.

Hi GC,

This is due to your Windows display settings.

For a correct display of Modelio, you can change the following setting in your Control Panel:

Go to `Control Panel > Display > Change display settings`

Change the value of the "Change the size of text, apps, and other items" option to 100%:

{{thumbnail(display_100.png, size=300, title=Screenshot)}}

(Click to enlarge)

This is a known issue that should be fixed shortly.

Just got round to replying to this fix, albeit on a different laptop.

The suggested fix makes things worse, not better. New image attached. Laptop is totally unusable at the suggested text scaling. Modelio as well
