|---|---------------------------|------------------------|-----------------|
| Status: | Resolved | Start date: | 08 January 2019 |
| Priority: | Low | Due date: | |
| Assignee: | Christophe Demeulemeester | % Done: | 50% |
| Category: | | Estimated time: | 0.00 hour |
| Target version: | Modelio 3.8.1 | | |
| Description | | | |
| Used Modelio version:Version 3.8.00Build: 201810021138System: win32 (6.1)Architecture: x86_64 | | | |
| Background: Normally, values of color channels (red, green, blue, alpha) range from 0 – 255.Context: When editing a rectangle of an Activity Diagram, it is possible to specify a “Fill alpha” value, specifying transparency of the fill color. | | | |
| Error:In case, the corresponding text field is activated, there is a help text describing the property as “Modify the element background alpha (0-225)”.I’ve tried to enter 255 and it did as expected, it showed the background color without transparency. | | | |
| Proposed Solution: Change the help text from “[…] element background alpha (0-225)” to “[…] element background alpha (0-255)”.Range: I’ve seen this error to also apply for “Grid alpha” and “Fill alpha” in case no element has been selected. The range is described equally wrong. | | | |

History

#1 - 08 January 2019 15:34 - Christophe Demeulemeester

- Status changed from New to Resolved
- Assignee set to Christophe Demeulemeester
- Target version changed from Modelio 3.8.0 to Modelio 3.8.1
- % Done changed from 0 to 50

Fixed in properties files : (0-225) has been changed to (0-255).
